

HAVE A SILENT EVENT ANYWHERE.

The wireless headphones allow your events to go beyond noise ordinances. Whether it is a party where noise level is enforced, a conference with simultaneous translation, a multi band festival, amongst others.

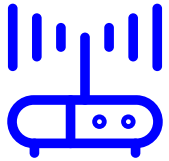

SELECT YOUR FAVORITE CHANNEL.

Our headphones receive up to 3 different signals, giving guests a choice between simultaneously playing channels. Channels are identified by 3 colors (blue, red and green).

HD SOUND.

The built-in system transmits HD quality sound, for either voice or music. Each headphone has individual volume control, allowing guests to control the volume. The headphones' battery lasts 8-10 hours between charges.

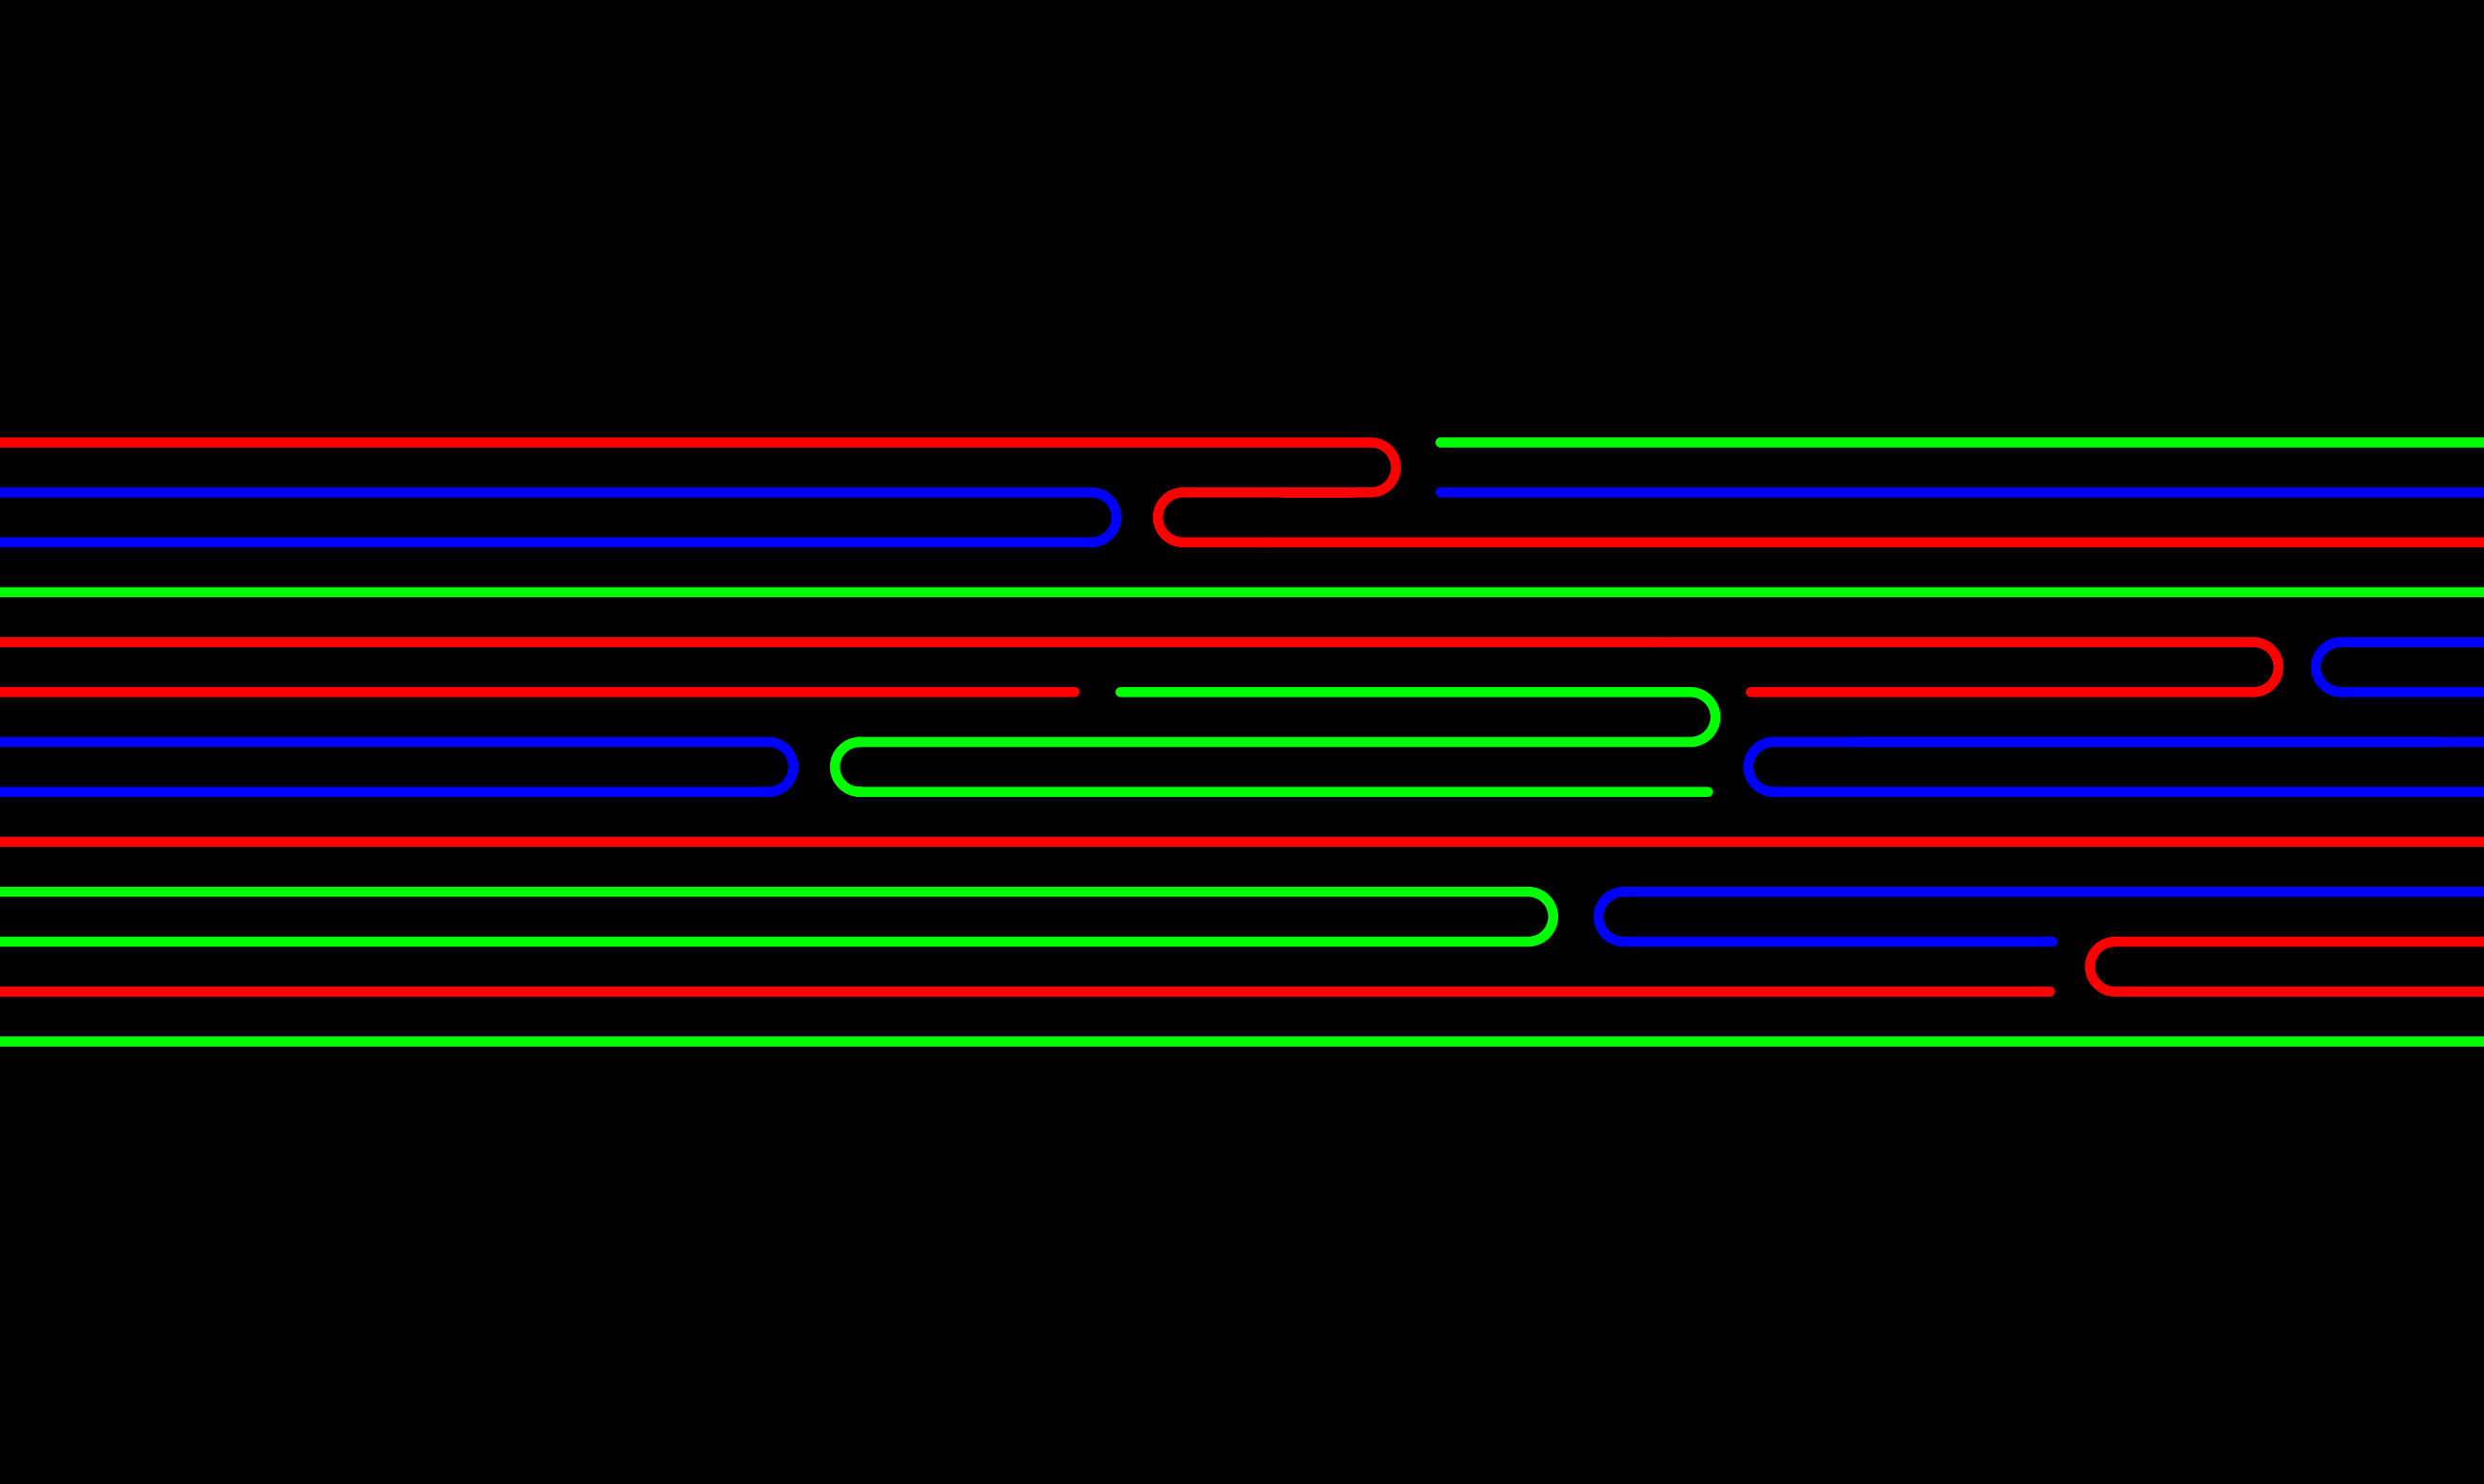

SOUND TRANSMISSION TO HEADPHONE.

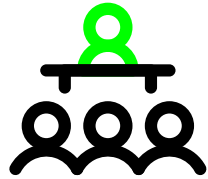

Audio is sent by the transmitter through an Ultra High Frequency - UHF signal, avoiding any type of interference. The signal transmission reaches over half a mile.

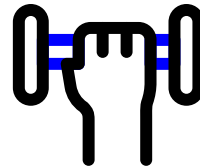

SERVICES

Conferences

Live streaming.

Training

Sound fuel.
